July 28, 2017

COMMUNITY BASED PRIMARY PREVENTION PROGRAMS GRANT

Questions and Answers from the July 24, 2017 Pre-Proposal teleconference.

Question #1:

Priority will be given to applicants who are prior recipients of the community based primary prevention grant or have successfully completed one year of the community based readiness grant or have participated in the 2015 and 2017 primary prevention summits, have existing staff with primary prevention experience; have an established community based coalition whose work focuses on SA, IPV and/or TDV; has an existing community prevention plan for the primary prevention of SA, IPV and/or TDV and have successfully implemented and evaluated at least one prevention strategy (such as, Green Dot, Coaching Boys into Men, Girls on the Run etc.) in their community within the past three years.

Would a primary coordinating/implementation partner listed under the award of a prior CBPPP recipient receive the above priority status?

Answer #1

Yes, if they can demonstrate their work played a key role in the success of the past grantees project efforts and meets all the additional components of prioritizations listed.

Question #2

In order to be eligible does your community has to have a coalition working on these issues or can it be a workgroup or some other type of coordinating body?

Answer #2

In order to be eligible, your community must demonstrate that there is an established group, comprised of multiple stakeholders that serve to plan for the primary prevention of intimate partner violence, teen dating violence and/or sexual assault. This entity must have established MOU's describing their role in the group and in efforts to prevent the topic areas in their community.

Question # 3

Can the MOU's submitted be new or can they already exist and/or how old can they be?

Answer # 3

The applicant must demonstrate their partnership (through MOU's) in a community based coalition that serves to plan for and implement SA, IPV and/or TDV programming. The MOU's submitted by applicants for this RFP can and should have been established at a prior date. This is a funding opportunity for communities with established coalitions (planning groups). MOU's demonstrate that participating stakeholders understand their role and have agreed to participate in the planning and implementation process of primary prevention work in ways that make sense for their agency and for the community prevention plan.

Applicants are to include existing or updated MOU's of their **current** coalition partners. Applicants can also include new MOU's to reflect new partnerships that serve to expand **existing** efforts under this RFP.

Question # 4

What if our agency has prevention staff funded under another source?

Answer # 4

Each proposal must list current primary prevention staff in FTE and the funding source for the position(s). If an agency does not currently employ primary prevention staff this proposal must include funding for a minimum of one FTE.

Question # 5

Is primary prevention programming directed at the primary prevention of child sexual abuse an eligible category under this RFP?

Answer #5

Yes. Child sexual abuse (primary prevention) falls under the broader category of sexual assault (primary prevention).

Note:

Please review the corrected RFP for additional corrections discussed during the pre-proposal teleconference.
